WMD Radiological/Nuclear Awareness

Train the Trainer: Jan. 29, 2007, 8:00 a.m.—5:00 p.m.

This course will prepare trainers to deliver a six-hour Radiation Awareness Course using a prepared lesson plan. Each participant will have an opportunity to learn the basics of platform presentation and classroom discussion and will present a portion of the Radiation Awareness Course as part of his or her training. After completion of the course, participants are eligible to conduct (indirect) courses for their agency and surrounding jurisdiction. *Prerequisite: Attendees must have previous experience as an instructor.*

WMD Radiological/Nuclear Responder Operations Course: Jan. 30-Feb. 1, 2007, 8:00 a.m. -5:00 p.m.

Training focuses on basic radiological detection, survey instruments, risk-based response, crime-scene preservation, personal protective equipment (PPE) and radiological incidents. The course consists of both classroom instruction and scenario-driven, hands-on, performance-oriented practical exercises with actual radiological sources. Although every participant will be issued a radiation survey meter, participants are encouraged to bring their own from their home departments or jurisdictions. Please do not bring any meters that have their own radiological check source. *Prerequisite: Awareness — Train the Trainer on Jan. 29 or previous completion of AWR 140 Awareness Course.*

Target Audience:

- Law enforcement
- Fire service
- Haz-Mat technicians
- Bomb squads
- Public health service
- Emergency medical services
- Other emergency management personnel
